Short Bio

Felix Juefei Xu (publish under *F. Juefei-Xu*) received the Ph.D. degree in Electrical and Computer Engineering from Carnegie Mellon University. During his Ph.D studies, he was working in a research group specializing in pattern recognition, machine learning, computer vision, and image processing, especially as applied to the field of biometrics, in *Carnegie Mellon CyLab Biometrics Center* under the supervision of *Prof. Marios Savvides*. His current research is focused on a fuller understanding of deep learning where he is actively exploring new methods in deep learning that are **statistically efficient** and **adversarially robust**. His Ph.D. work is primarily focused on tackling the Pose, Expression, Resolution, Illumination, and Occlusion (Perio) challenges for unconstrained periocular face recognition using shallow and deep discriminative and generative methods, especially under the dome of self-supervised predictive learning. He also has broader interests in pattern recognition, computer vision, machine learning, optimization, statistics, compressive sensing, and image processing. He is the recipient of multiple best/distinguished paper awards, including the **Best Poster Paper Award** of the *IEEE/IAPR International Joint Conference on Biometrics (IJCB)* in 2011, the **Best Paper Award** of the *IEEE International Conference on Biometrics: Theory, Applications and Systems (BTAS)* in 2015, the **Best Student Paper Award** of the *IEEE BTAS* in 2016, the **ACM SIGSOFT Distinguished Paper Award** of the *IEEE/ACM International Conference on Automated Software Engineering (ASE)* in 2018, and the **Best Student Paper Award** of the *14th Asian Conference on Computer Vision (ACCV)* in 2018.
